

## Table 1 (paper reference numbers, NOT measured)

From the ReCodeAgent paper itself -- never blended with measured CodeWeaver data.

| source          | tool | total_loc | total_loc_precise | validated_tests | validated_tests_c<br>rust | validated_tests_o<br>xidizer | validated_tests_a<br>lphatrans | validated_tests_s<br>kel | translated_tests_<br>excluding_crust | functions | function_validation_<br>denominator_<br>on_crust |
|-----------------|------|-----------|-------------------|-----------------|---------------------------|------------------------------|--------------------------------|--------------------------|--------------------------------------|-----------|--------------------------------------------------|
| paper_reference | ALL  | 230000    | 233057            | 2107            | 623                       | 229                          | 1181                           | 74                       | 1484                                 | 4583      | 1397                                             |
