

EvoC2Rust: CodeWeaver evidence profile

This profile audits every empirical surface identified for EvoC2Rust and records the maximum scientifically defensible CodeWeaver comparison. Status: `partial_existing_result`. Three repetitions cover public Vivo-Bench; C2R-Bench and industrial projects are unreleased.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

100% incremental compilation, fill compilation, and fixed-test rate; mean SafeRate 30.92% (results/evoc2rust-codeweaver-comparison-2026-08-13).

Complete empirical-surface audit

key	surface	denominator	metrics	status
evoc2rust	Table 4	Vivo-Bench and unreleased C2R-Bench	ICompRate, AccRate-P/R, SafeRate	public_subset_existing_result
evoc2rust	Table 5	Vivo-Bench modules and unreleased projects	FCompRate and TestRate	public_subset_existing_result
evoc2rust	Table 6	paper ablation configurations	skeleton, mapping, repair ablations	reference_only_unreleased_inputs
evoc2rust	RQ4 figures	six industrial projects	scale and elapsed time	blocked_unreleased

Inclusion and execution decision
