

Formal Compositional Reasoning: CodeWeaver evidence profile

This profile audits every empirical surface identified for Formal Compositional Reasoning and records the maximum scientifically defensible CodeWeaver comparison. Status: not_comparable. Methodology/position contribution lacks a compatible released project oracle.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

No separate compatible CodeWeaver result package.

Complete empirical-surface audit

key	surface	denominator	metrics	status
formal-compositional	Empirical evaluation	none	position paper; no quantitative tables	not_applicable

Inclusion and execution decision
