

Hayroll: CodeWeaver evidence profile

This profile audits every empirical surface identified for Hayroll and records the maximum scientifically defensible CodeWeaver comparison. Status: not_comparable. Specialized preprocessing task has no shared end-to-end metric.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

No separate compatible CodeWeaver result package.

Complete empirical-surface audit

key	surface	denominator	metrics	status
hayroll	CRUST-Bench macro/config evaluation	paper-selected CRUST inputs	macro and conditional-compilation reconstruction	public_artifact_not_comparable
hayroll	LibmCS and zlib evaluation	two macro-heavy systems	translation and macro preservation	public_artifact_not_comparable

Inclusion and execution decision
