

LAC2R: CodeWeaver evidence profile

This profile audits every empirical surface identified for LAC2R and records the maximum scientifically defensible CodeWeaver comparison. Status: reference_only. Eight subject names overlap the Rustine suite, but revisions/contracts are not proven identical.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

Complete empirical-surface audit

key	surface	denominator	metrics	status
lac2r	Table 2	7 GNU coreutils programs	safety ratio, compile/repair/test rates, queries, tokens, lints	reference_only
lac2r	Table 3	10 Laertes programs	safety ratio, compile/repair/test rates, queries, tokens, lints	reference_only_name_overlap_only
lac2r	Table 4	124 TRACTOR public programs	safety, compile/pass, lints, queries, tokens	reference_only
lac2r	Table 5	coreutils	homogeneous versus heterogeneous LLM ablation	reference_only
lac2r	Figures 6-8	three benchmark families	safety, compilation, idiomatcity	reference_only

Inclusion and execution decision
