

MatchFixAgent: CodeWeaver evidence profile

This profile audits every empirical surface identified for MatchFixAgent and records the maximum scientifically defensible CodeWeaver comparison. Status: not_comparable. Validator/repair verdict metrics are not translator success metrics.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

No separate compatible CodeWeaver result package.

Complete empirical-surface audit

key	surface	denominator	metrics	status
matchfixagent	Validation evaluation	repository translation pairs	verdict coverage and agreement	reference_only_not_comparable
matchfixagent	Repair evaluation	inequivalent translation pairs	repair success versus baseline	reference_only_not_comparable
matchfixagent	Ablation	paper evaluation set	verdict accuracy and token use without analyses/test generation	reference_only_not_comparable

Inclusion and execution decision
