

Fine-Tuning Qwen3-27B: CodeWeaver evidence profile

This profile audits every empirical surface identified for Fine-Tuning Qwen3-27B and records the maximum scientifically defensible CodeWeaver comparison. Status: not_comparable. Function-level SACTOR evaluation is not a repository project oracle.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.
