

RustAssure: CodeWeaver evidence profile

This profile audits every empirical surface identified for RustAssure and records the maximum scientifically defensible CodeWeaver comparison. Status: public_artifact_metric_mismatch. Function-level KLEE equivalence is not CodeWeaver project pass-all.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

No separate compatible CodeWeaver result package.

Complete empirical-surface audit

key	surface	denominator	metrics	status
rustassure	Main differential-symbolic evaluation	5 real applications/libraries	89.8% function compilation and 69.9% symbolic-return equivalence	aggregate_reference_public_read_only

Inclusion and execution decision
