

Rustine: CodeWeaver evidence profile

This profile audits every empirical surface identified for Rustine and records the maximum scientifically defensible CodeWeaver comparison. Status: exact_existing_result. Leakage-safe CodeWeaver evaluation on all 23 released subjects.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

21/23 compile; 10/21 fixed-contract pass (results/rustine-codeweaver-comparison-2026-08-12).

Complete empirical-surface audit

key	surface	denominator	metrics	status
rustine	Table 1	23 repositories	benchmark coverage	exact_existing_result
rustine	Table 2	23 repositories / 21 testable	compilation, function/line coverage, assertions	exact_existing_result
rustine	Table 3	23 repositories	pointer arithmetic, raw pointers, unsafe lines/casts/calls	exact_existing_result

Inclusion and execution decision
