

RustPrint: CodeWeaver evidence profile

This profile audits every empirical surface identified for RustPrint and records the maximum scientifically defensible CodeWeaver comparison. Status: public_artifact_new_run_required. CodeWikiBench's eight repositories are disjoint from retained CRUST-Bench tasks.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

No separate compatible CodeWeaver result package.

Complete empirical-surface audit

key	surface	denominator	metrics	status
rustprint	Benchmark statistics	8 repositories / 11K-84K LoC	repository size and documentation	reference_only
rustprint	Table 1	8 CodeWikiBench repositories x 5 systems	compilation	exact_reference_public_artifact
rustprint	Table 2	8 repositories x 2 cross-generated test suites	true-positive rate	exact_reference_public_artifact
rustprint	Figures 2 and 4	8 repositories x systems/backbones	feature preservation and SafeRate	exact_reference_public_artifact

Inclusion and execution decision
