

SACTOR: CodeWeaver evidence profile

This profile audits every empirical surface identified for SACTOR and records the maximum scientifically defensible CodeWeaver comparison. Status: exact_existing_result. Three CodeWeaver repetitions on the exact 50-project subset.

Evidence boundary

Paper values and CodeWeaver measurements remain separate unless subject identity, revision, denominator, and fixed oracle are verified. Missing values are not converted to zeros.

Existing result

150/150 build; 92/150 pass all (results/sactor-codeweaver-comparison-2026-08-14).

Complete empirical-surface audit

key	surface	denominator	metrics	status
sactor	Figures 2-3	100 TransCoder-IR + 100 CodeNet programs	success through six attempts and Clippy alerts	exact_existing_result
sactor	Tables 1-3	two 100-program sets, CRUST-Bench-50, libogg-77	unsafe code, translation success, lints and attempts	exact_existing_result
sactor	Tables 5-9 and Figure 8	paper datasets, models and ablations	dataset, model, failure, cost, feedback and CRUST-Bench baseline comparisons	exact_existing_result

Inclusion and execution decision
